

memo

visual studio code can make text files
web browser cannot read and understand this tho...

1. HTML, CSS, Javascript
2. Oracle, Database
3. Java
4. Jsp
5. Spring Frame Work
6. Vue

Why do we use web browser?

it can be used from any platform(Windows, Mac os, Android, ios...)

basically easier to publish for company

web server application is already developed. no need to develop app. just make service

HTML - information

mark up language

<!-- --!> comment

CSS - design

after title <style> </style>

elementName{

attributeName : value;

}

attribute names are set up

Javascript - language

dev tools, console

Try right instantly Javascript runtime

String " "

calculate

<script> </script>

웹브라우저는 한번만 로딩을 하는 것이 아님

여러가지 소스를 로딩 웹서버가 있다면 서버에서 받아옴

개인 컴퓨터에서 받아올 수도 있음 상대경로(Relative path), 절대경로(Absolute path)

emmet (<https://docs.emmet.io/cheat-sheet/>)

aaa.bbbbbb = <aaa class="">

aaa#bbbbbb = <aaa id="">

aaa.bbbbbb#cccccc = <aaa class="" id="">

aaa*n = <aaa> * n

.....

현재경로는 ./ 상위경로는 ../
